

Program to convert fahrenheit to celsius

```
#include <stdio.h>
```

```
#include <conio.h>
```

```
int main() {
```

```
    float cel, fahr;
```

```
    clrscr();
```

```
    printf("Enter a value in fahrenheit ");
```

```
    scanf("%f", &fahr);
```

```
    cel = ((fahr - 32) * 5) / 9;
```

```
    printf("\n The value of temperature in  
    celsius is %f", cel);
```

```
    getch();
```

```
    return 0;
```

```
}
```

Output

Enter a value in fahrenheit 50

The value of temperature in celsius is 10.000000
