```c
#include <stdio.h>
int convert ( int h, int m);

void main()
{
    int h,m,t;
    clrscr();
    printf ("Enter the time in hr min : \n");
    scanf ("%d %d", &h, &m);
    t = convert (h, m);
    printf (" Time in minutes is %d min", t);
    getch();
}

int convert (int h, int m)
{
    int t;
    t = m + h * 60;
    return t;
}
```
