```c
#include <stdio.h>
void main(){
    int stor[10], n, i;
    float avg;
    clrscr();
    printf(" Enter the number of inputs");
    scanf("%d", &n);
    printf("\nEnter %d inputs \n", n);
    for(i=1; i<=n; i++)
    scanf("%d", &stor[i]);
    avg =0;
    for(i=1; i<=n; i++)
    avg += stor[i];
    avg /=n;
    printf("\nThe average of %d numbers is
    %.2f \n", n, avg);
    getch();
}
```
